SERVICES OF JEIL SR GROUP

JEIL SR GROUP
always do researches and develop new technology
with continuous efforts.

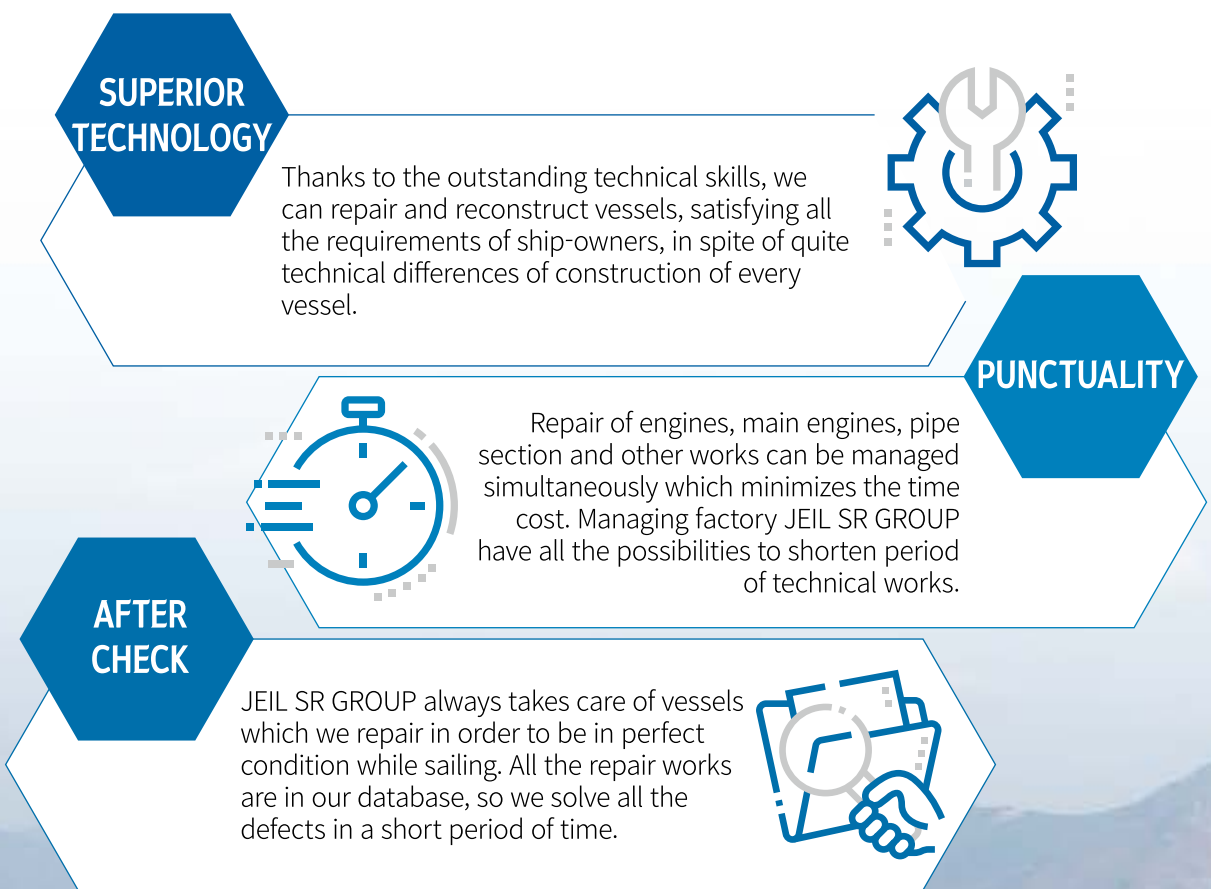

As main parts of vessels which are Main and Auxiliary Engines are very important not to cause an accidents since it will bring to major damages. In order to prevent these kind of cases we concentrate on safe and accurate vessel repairing. Therefore, thanks to 30 years of experience of concrete schedule and continous technical developments, we guarantee high quality repairs of such as Main Engine, Generator, Internal combustion engine, hull and dock repairs and other total repairs. Moreover, in spite of strictest requirements of shipowners, we JEIL SR GROUP always have positive responds and positive attitude. JEIL SR GROUP is the company that has gained recognition from customers for many years and we can state with confidence that we are the best ship repairing company in Korea.

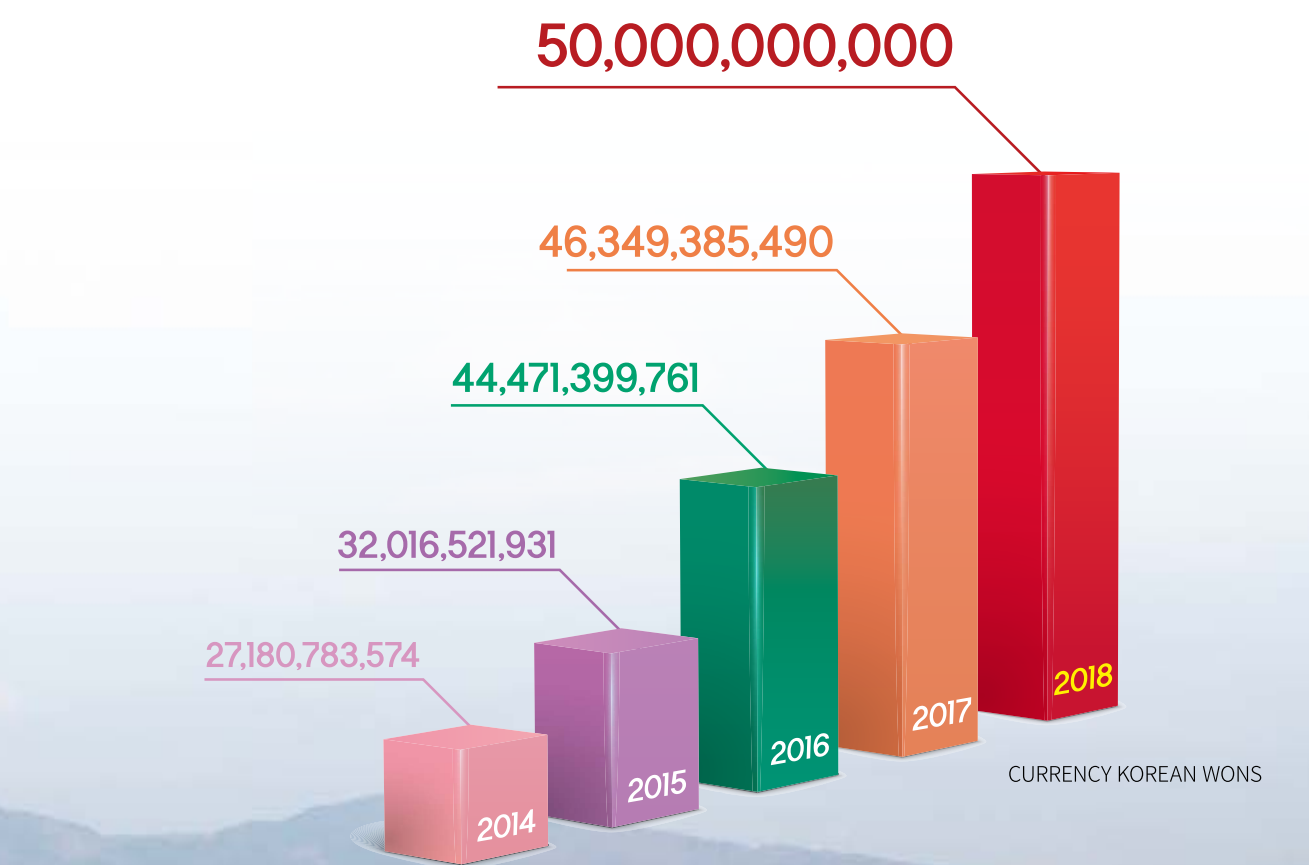

STRONG POINTS OF JEIL SR GROUP

We provide the best service to our customers with systemized processes such as thorough planning, supervising and after checking services.

SALES BREAKTHROUGH TO 50 BILLION

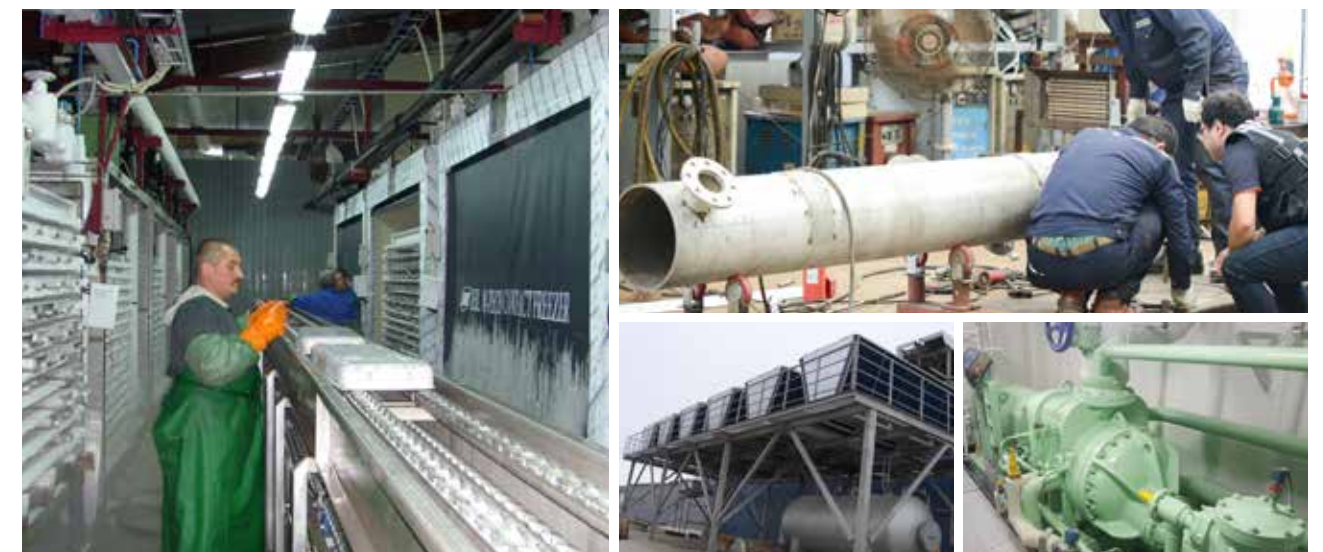

REFRIGERATION • REFRIGERATION EQUIPMENT REPAIRS

JEIL M-TECH CO., LTD is a parent company of the entire Group. Since its establishment in 1991, it has been constantly installing and managing refrigeration system and refrigerating facilities.

Since then, it has been researching and developing under the leadership of founders for about 30 years. Since refrigeration equipment is a mechanism for managing heat, it is an industry that requires high technology to keep the heat cycle at its best. In recent years, the equipment itself has been modernized with the IC technology to make adjustments. In this regard, the technology accumulated for a long time is very competitive. Especially, we are presenting our technical services and advanced techniques to many fishing companies which require thoroughly care to refrigerated cargo ships equipped with refrigeration system and freezing facilities.

MAIN AND AUXILIARY ENGINE • HYDRAULIC EQUIPMENT • ELECTRIC PART REPAIRS

JEIL C.M CO., LTD is a company that installs and manages the engine room system, which can be called the heart of the ship. Operating a metallurgical plant that is equipped specifically for repair and standardization on the basis of accurate data and drawing designs. Our company is constantly engaged in research and development to avoid any slightest disruption to the engines on the ship. This is an advanced technique in the form of the Total Management Operation System, which is the next level of the improved shipbuilding repair method. The main success of the company is not only in the presence of high-tech equipment and professional workers, but also in the new approach to working with shipping companies. JEIL C.M CO., LTD seeks to become a global company, which is based on the main criterion for evaluating the work of the company - the quality of the services provided.

DOCKING REPAIRS

JEIL SYC CO., LTD is a company that deals with repairs when delivered to the dock. Restoration of a damaged hull is necessary, as anti-corrosion and anti-oxidation work can only be carried out at docking stations. In addition, the repair of various tanks and internal pipes connected to the hull cannot be carried out at sea, therefore this is only possible in docking state. The condition of the hull is the most direct part of the supervision of the ship, because it is related to the lifespan of the ship. There are many nuances in the repairs while in docking condition that require efficiency in accordance with the established schedule, so they must be carefully planned and executed. The reason why JEIL SYC CO., LTD receives many requests for repair from shipping companies is that we work taking into consideration not only the repair schedule, but also keep the best quality.

REPAIR OF FISH PROCESSING EQUIPMENTS

HIGH C-TECH CO., LTD installs and repairs equipment for fish processing rooms installed on large factory trawlers. Fish processing factory trawlers are ships that include processing of the fishes. The main work of the ship is to clean and process the fish and shellfish that have been caught out at sea.

Processing fish at sea and aboard ships is a standard part of the commercial fishing industry. Therefore, HIGH C-TECH CO., LTD makes sure such important equipments work without any slightest technical failures.

HYDRAULIC AND DECK EQUIPMENT REPAIR

HIGH ONE TECH CO., LTD is specialized in repairing pipes and hydraulic equipment. Ship pipe is connecting important machinery such as generator power, shafting and requires delicate work and high technology. Our company gained Korean welders' certificate and skilled technicians, so we are perfecting steel plate and pipe work according to drawings and samples.

We are pleased to provide satisfactory service repairs in order to provide safe and smooth work in vessel.

PASSION CREATIVITY FLEXIBILITY

WE HAVE REPAIRING EXPERIENCE OVER
1,400 VESSELS SINCE 1990.
